**CRP NOTE # 82**  
**March 30, 1998**

The attached information from the South Dakota Extension Service provides guidance on:

1. The use of herbicides for new or established CRP plantings
2. Herbicides with label restrictions for CRP planting the following season.

MN Extension Service has reviewed this material and found it to be accurate and useful for MN producers with CRP. One correction of note is that the herbicide "Pursuit" should have a carryover restriction of 12 months for new grass plantings (establishment), not 40 months as shown.

Questions on the technical interpretation of this information should be directed to your local MN Extension Service personnel.

WILLIAM HUNT  
State Conservationist
